BOARD REVIEW FOR THE THREE MONTHS ENDED 31 DECEMBER 2024

For the first quarter (Q1) of the 2025 financial year, the Group earned \$21.7m in Profit from operations, before Other gains/(losses) - net. If we were to exclude a one-time employee benefit expense of \$2.0m recorded during the quarter, Profit from operations before Other gains/(losses) - net would be in line with prior year at \$23.8m.

Caribbean Distribution Partners Limited (CDP) was the largest contributor to the bottom line for the period as Revenues grew by 4.2%. At the end of Q1, CDP acquired the remaining 20% of the issued and outstanding shares of Chinook Trading Canada Limited, having previously purchased 80% of the company in May 2023.

Our Catering and Ground Handling Division continued to perform well as Airline Catering accounted for the majority of its profitability.

The Manufacturing Division was plagued with inefficiencies during the quarter; however, the division exceeded its target set as Ecuador Kakao Processing Procuakao S.A. (Ecuakao) posted an Operating profit in comparison to a loss in the comparative period. Included within the cash flow hedge in the Statement of Comprehensive Income at the end of December, is an unrealised mark to market loss of \$29.0m related to unmatched cocoa futures. The Board has subsequently taken a decision to cap this loss at a cost of \$9.7m. This means that our maximum loss from this exposure is \$38.7m, however, if there is a decline in the market price of cocoa beans, the loss will consequently decline. An Independent Review Committee of the Board has been commissioned to work with external consultants to make recommendations on preventing a reoccurrence. We have increased our resources within the Manufacturing Division to assist with turning around Ecuakao and mitigating against the risks faced as volatility in the market price of cocoa continues.

The Building Supplies Division grew its topline by 4.6%, however its operating profit fell below that of the prior year as subsidiaries in St. Lucia and Barbados experienced declines.

Despite sluggish sales in Barbados and Jamaica markets, the Automotive Division recorded an increase in operating profit as gross margins increased.

Our Shipping Division's operating profit was on par with that of the prior year and our Services Division's performance was satisfactory.

Our effective tax rate exceeded that of the comparative period in the prior year as higher income was earned in higher taxed jurisdictions. After accounting for increased taxation, the Group's Net income for the quarter was \$22.4m with an earnings per share of 7.3 cents.

At the end of Q1, our interest-bearing debt to equity ratio was 34:66, which is well within industry standards. Our net asset value per share was \$3.11.

Management is fully committed to resolving any challenges currently facing the Group while capitalizing on our strengths as a diverse and resilient group. We wish to thank all our stakeholders for their continued support.

A. Charles Herbert
